

# Finding the Balance Nuclear Power in Society

October 25 & 26, 2009

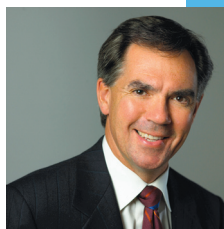

The Hampton Inn  
Ottawa & Conference  
Centre  
Ottawa, Ontario

## ABOUT THE CONFERENCE

The Council for Clean & Reliable Electricity and the Waterloo Institute for Sustainable Energy are pleased to invite you to **Nuclear Power in Society: Finding the Balance**. The conference is intended to provoke public debate on the place nuclear power has in our national and global strategy. It will focus on three critical nuclear themes – cost, safety and waste management. This will be an excellent opportunity to share insights and learn more about the latest developments from leaders in public policy and nuclear energy.

*Keynote Address* by The Honourable **Jim Prentice**, Minister of the Environment

As Canada's Minister of the Environment, Jim Prentice is responsible for Canada's participation in the Clean Energy Dialogue established by Prime Minister Harper and President Obama, for Canada's role in international climate change negotiations in the 2009 Major Emitters' process, and the negotiations on the world-wide agreement on the environment in Copenhagen later this year. The Minister will be setting the context for the future of energy and the environment in Canada, and the critical need to address the global energy and environment needs for the world.
