

Canada does have a head start

Development of CO₂ emission intensity of electricity generation

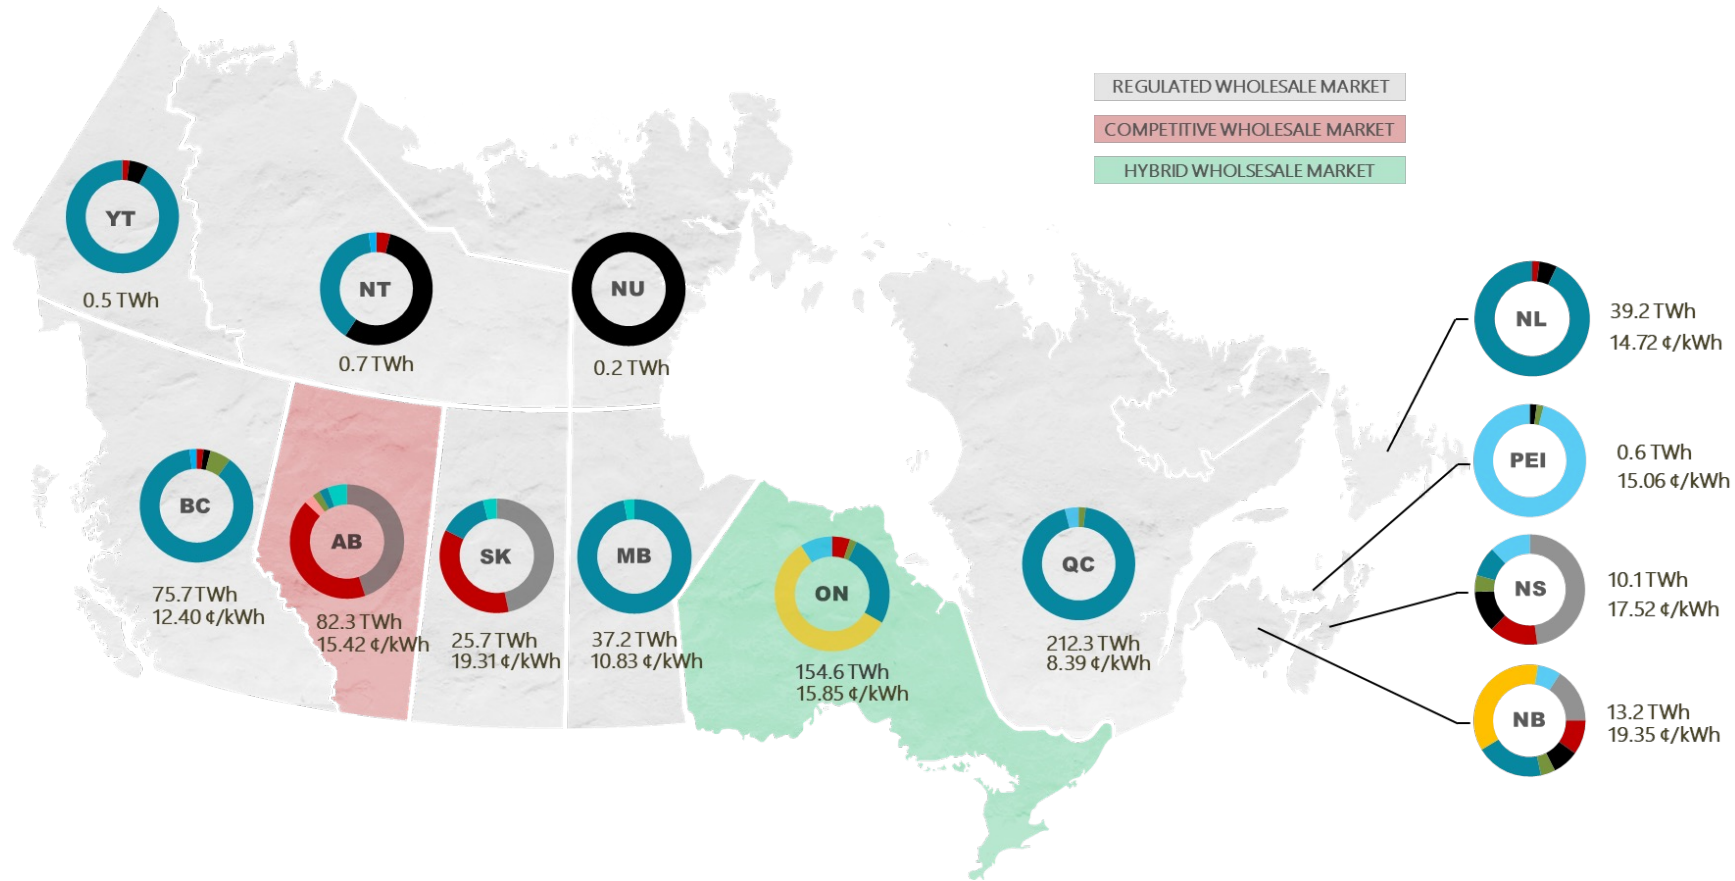

Source: IEA (2020), [CO₂ emissions statistics](#).

Canada already has a low-carbon electricity system – a key first step to a low-carbon energy system

“Not a country”

Electricity market structures and sources in Canadian provinces and territories

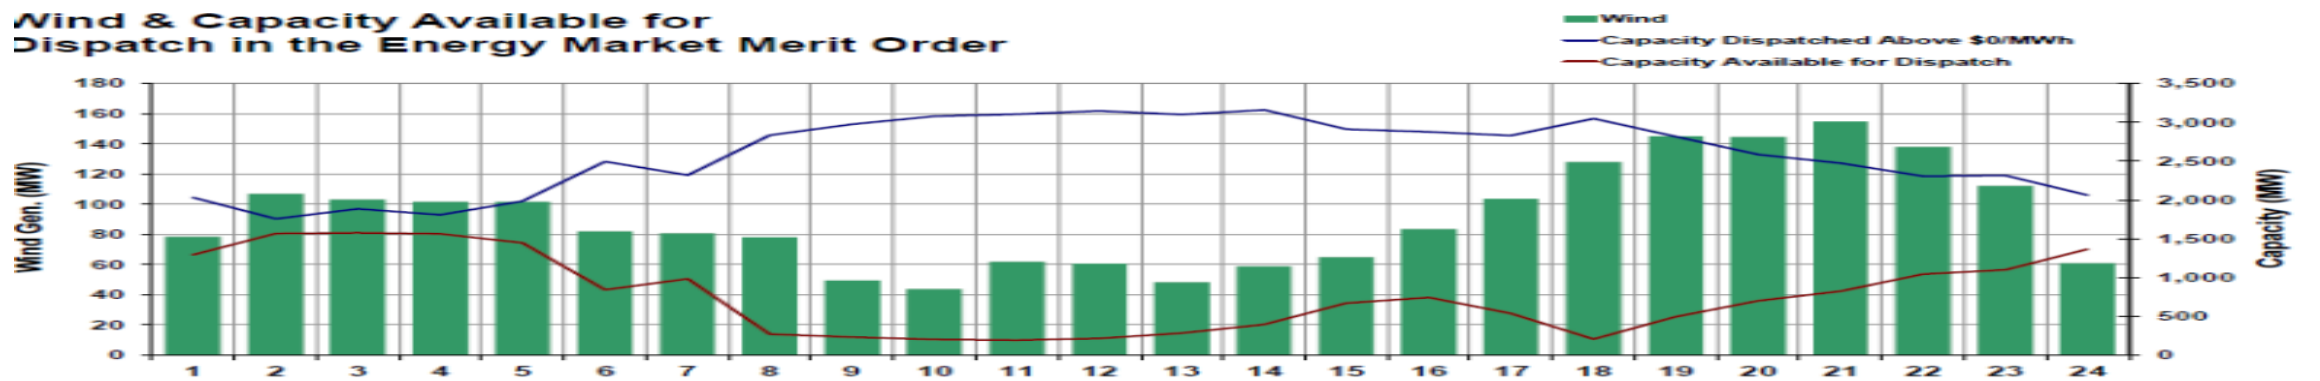

Canada has diverse electricity market structures and power mixes across its provinces and territories, with limited interconnectivity.

Perhaps the neighbours could help...

AESO Daily Market Report, 14 January 2020 (source: AESO)

Daily Market Report Tuesday, January 14, 2020

Although wind had averaged 42.4% over previous 30 days, on this day averaged 5.1%
